Modified atmosphere (MA) and controlled atmosphere (CA) technologies have great potential in a wide range of applications. The increasingly global nature of food production and the increased emphasis on reducing chemical preservatives and pesticides have put the spotlight on these centuries-old technologies. Yet until now, there have been very few current resources available, and none have covered all aspects. Provides extensive background on the theory and application of modified and controlled atmospheres Written by top international experts in research and industry, Modified and Controlled Atmospheres for the Storage, Transportation, and Packaging of Horticultural Commodities explores the science and application of the modified atmosphere (MA) and the controlled atmosphere (CA). It covers all technological applications, including storage, transport, and packaging for all fruits, vegetables, and ornamentals of temperate, subtropical, and tropical origin. Tracing the historical developments of these technologies, it provides information on the ideal conditions to be used for many horticultural commodities. It also outlines the effects of MA and CA on the physiology and biochemistry of these commodities as well as on their flavor and quality. Providing the most comprehensive resource on all basic and applied aspects of these technologies, the text also reviews the vast amount of literature already written on this topic. This extensive work captures, for the first time, the entire subject of MA and CA, presenting a complete review of the technological aspects of this important development in food safety and preservation.

Refrigeration, Air Conditioning and Heat Pumps, Fifth Edition, provides a comprehensive introduction to the principles and practice of refrigeration. Clear and comprehensive, it is suitable for both trainee and professional HVAC engineers, with a straightforward approach that also helps inexperienced readers gain a comprehensive introduction to the fundamentals of the technology. With its concise style and broad scope, the book covers most of the equipment and applications professionals will encounter. The simplicity of the descriptions helps users understand, specify, commission, use, and maintain these systems. It is a must-have text for anyone who needs thorough, foundational information on refrigeration and air conditioning, but without textbook pedagogy. It includes detailed technicalities or product-specific information. New material to this edition includes the latest developments in refrigerants and lubricants, together with updated information on compressors, heat exchangers, liquid chillers, electronic expansion valves, controls, and cold storage. In addition, efficiency, environmental impact, split systems, retail refrigeration (supermarket systems and cold rooms), industrial systems, fans, air infiltration, and noise are also included. Full theoretical and practical treatment of current issues and trends in refrigeration and air conditioning technology Meets the needs of industry practitioners and system designers who need a rigorous, but accessible reference to the latest developments in refrigeration and AC that is supported by coverage at a level not found in typical course textbooks New edition features updated content on refrigerants, microchannel technology, noise, condensers, data centers, and electronic control

J.J. Keller's Fleet Management Pro: Your A to Z Guide to Managing a Fleet Operation has answers to the pressing business issues that affect your daily operations and your company's bottom line. This must-have manual is the first comprehensive resource focused on the business of trucking. It helps you manage fleet operations to maximize efficiency and effectiveness, as well as deliver maximum revenue and profits.

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Learn Architectural Design using AutoCAD This book shows you how to create architectural drawings and 3D models one step at a time. Brief explanation and step-by-step instructions make this book a perfect way to get started with Architectural Design using AutoCAD. In addition, you can download the working files for chapter from the website, and use them for any help. Author first introduces the AutoCAD interface, and then moves directly into Architectural drawings. You will learn to draw walls, doors and openings, windows, stairs, and elevations. Later, you will use the 2D drawings to create a 3D model. Some of the skills you can acquire from this book are: - Import Hand-drawn drawings and use them to create CAD drawings - Use Dynamic Blocks to create doors and windows - Add dimensions and annotations to the drawing - Create elevations and 3D model Table of Contents Part 1: Creating 2D Architectural Drawings - Starting AutoCAD 2018 - Inserting Hand Sketches - Scaling the Hand Sketches - Saving the Document - Creating Layers - Creating Grid Lines - Creating Walls - Creating Doors and Windows - Creating Stairs - Creating the First Floor Plan - Creating the Sliding Doors - Creating the Balcony - Creating Kitchen and Bathroom Fixtures - Adding Furniture Blocks - Adding Hatch Patterns and Text - Adding Text Labels - Creating Elevations - Hatching the Elevation Views - Adding Dimensions - Creating Grid Bubbles - Layouts and Title Block - Printing Part 2: Creating 3D Architectural Model - Importing 2D Drawings - Creating 3D Walls - Create the Ceiling - Creating Doors on the Ground Floor - Creating 3D Windows - Creating 3D Stairs - Modeling the First Floor - Creating the Balcony - Creating Railing - Creating the Roof - Creating the Terrain surface Part 3: Rendering - Adding Materials - Adding Cameras - Adding Lights - Rendering Download Resource files from www.tutorialbook.info If you are an educator, you can request a free evaluation copy by sending us an email to online.books99@gmail.com
