Encyclopaedia Of Environment Has A Wide Coverage And Comprehensively Studies The Global Environmental Change And Environmental Degradation Mainly Caused By Human Interference Air Pollution And Ozone Depletion, Greenhouse Effects, Climatic Change, Land Degradation, Deforestation, Desertification, Loss Of Biodiversity, Surface And Groundwater Contamination, Hazardous Wastes And Agricultural Pollution, And Several Other Problems Related To Environment That Are Of Primary Concern.It Is Highly Likely That Environmental Degradation Would Reduce The Capacity Of Human Societies To Maintain Their Lifestyles At Existing Levels Since The Driving Forces Of Global Economy May No Longer Be Able To Use In Sustained Manner The Limited Resources Of The Earth. Although The Consequences Of Environmental Degradation Are Sometimes Not Recognized But In Many Cases They Are Intentionally Ignored Because Of The Illusory Higher Economic Gains.Realising The Urgent Need For Arresting The Trend; For Developing Awareness In The Readers About The Preservation Of Biodiversity And Its Significance For Life, Sustainability And Equity; And For Warning Against The Consequences Of Environmental Exploitation As Well, The Present Encyclopaedia Of Environment Has Been Compiled. It Not Only Studies The Problems Related To Environment But Also Suggests Suitable Remedial Measures Attempts Have Been Made To Include In These Well-Documented Volumes All The Latest Major Policies Adopted By The United Nations Organisation And Its Affiliated Agencies As Well As By The Developed And Developing Countries Across The World.The First Four Volumes Of The Encyclopaedia Include Papers On Environment, Glossary Of Global Warming And A Detailed Bibliography To Enable The Readers To Pursue The Study Further. The Following Five Volumes Include International, Regional And National Conventions; Protocols; Treaties And Agreement Relating To Environment And The Indian Laws For Clean Environment, And Pollution Control.The Book Would Be Highly Useful For Students And Researchers Engaged In The Study Of Environment. It Would Also Be Useful To Government Executives And Ngos Concerned With Environment And Pollution Problems. Since The Laymen Are Deeply Interested In Clean Environment, The Book Would Be Of Great Interest To Them.

This book constitutes the thoroughly refereed proceedings of the 18th International Conference on Transport Systems Telematics, TST 2018, held in Krakow, Poland in March 2018. The 36 full papers presented in this volume were carefully reviewed and selected from 128 submissions. They present and organize the knowledge from within the field of telematics in road transport, in rail transport, in marine transport, in air transport, in logistics.

The hydrogen car has been proposed as the solution to our oil problems, but how would it work, and what potential problems associated with it? This book addresses these questions and provides specifics about current developments toward a hydrogen-based energy infrastructure. It offers the reader an informed look at the current state of fuel cell power and transportation technology, and where it's headed.

The structure and policy architecture of the world economy, as it emerges from the historic challenges now underway, will be affected by the dramatic rise of Asian economies and deepening connections among them. This important book examines the dramatic transformation of the Asian economy, the challenges it faces, emerging regional solutions, and how Asia can play a more constructive role in the global economy. Asia is becoming not just the world's factory, but also its leading creditor, and one of its key sources of dynamism and stability. Key questions are identified and addressed in three areas: Asia's growth and productivity, financial stability, and regional economic integration. In each of these areas, the contributing authors evaluate current trends and the forces shaping the future. They consider whether the regions progress is sustainable and what it will take to make it so. How is Asia reshaping its economy in response to the changing global landscape? More urgently, how can Asia weather the severe, global financial and economic stormoriginating from the global credit crisis? How will it extend its gains to people left behind? And how can it contribute to better governance and greater prosperity in the world economy? This book covers new ground by connecting theory, assembling detailed evidence on trends and challenges, and offering forwardlooking policy prescriptions. This timely book will appeal to Asian economic policymakers as well as postgraduate students interested in Asian economics, international economics and regional integration. Staff of international and regional organizations interested in Asian economics will also find this book invaluable.

Narrow Margins — a laugh-out-loud book which proves that lean times can sometimes be a very positive thing. Faced with the loss of everything following the collapse of the Rover Group, Marie Browne moved her long-suffering husband Geoff, chaotic children and smelly, narcoleptic dog on to a houseboat in search of a less stressful, healthier, alternative way of life. Strapped for cash, the family buy a decrepit 70ft barge called Happy Go lucky which had been run as a floating hotel. Outdated and in need of a complete refurbishment, Happy becomes their floating home. First they need to learn the ropes and many pitfalls beset their adventures. As they come to terms with living on a narrow boat, readers gain a fascinating insight into life in the slow lane. About the author: Marie Browne is a genty harrassed mother of three who, for the past fifteen years, has been desperately trying to escape the Customer Service Industry. Apart from her husband and kids, the best things in her life are real ale; barbecues; ugly mad dogs that nobody else wants and cream-covered designer coffees. She also has an obsession with shoes but her husband is threatening to get her help for that.
