The first edition of the Drilling Data Handbook was printed in 1950. In more than six decades the book has got improved, adding lots of new technologies and equipments along its eight additional editions. But its principle is to remain familiar and friendly to users. Its philosophy has always been to give a quick access to the basic information or calculations for the office or field operations.

A reference to help nursing students and practising nurses select a nursing diagnosis and write plans of care with ease and confidence. The book provides care plans for every NANDA diagnosis and provides a quick access index of appropriate nursing diagnoses for over 1200 clinical entities.

For all undergraduate- and graduate-level courses across the Nursing curriculum, especially clinical courses. This easy-to-use guide gives students instant access to information needed to write thorough, individualized care plans based on the most recent NANDA-approved nursing diagnoses. Nursing Interventions Classifications (NIC) and Nursing Outcome Classifications (NOC) are incorporated throughout. The guide presents diagnoses associated with medical, surgical, psychiatric, perinatal, and pediatric patient populations. Each Plan of Care includes: definition of nursing diagnosis, defining characteristics, related factors, suggestions for use, suggested alternative diagnoses, expected outcomes and evaluation criteria, NIC/NOC taxonomy, and suggested nursing actions.

This edition contains 189 care plans covering the most common nursing diagnoses and clinical problems in medical-surgical nursing. It includes four new disorders care plans, SARS, Lyme disease, West Nile virus, and obstructive sleep apnea.
