While some may consider Pathfinder honors as just study, theory, and book work, remember that the Pathfinder honor system is based on the philosophy, " an ounce of theory to a pound of practice. " Enjoyment and adventure are the keys to any honor achievement. Advanced Honors: A Glimpse Toward the Future

We Are the Pathfinders Strong is the story of the men and women who dedicated themselves to the church’s young people, and the young people who joined them in this exciting program. Around the world Adventist young people learn new skills and participate in fascinating activities, whether it be camping in the snow, exploring caves, witnessing to others, or serving as volunteers in humanitarian or civic outreaches.Whether you are a Pathfinder today, were many years ago, or would like to be... you'll find this book captures the joy and excitement of being a Pathfinder.

Presents a handbook for the identification of over five hundred species of trees by illustration and text.

Authoritative information presented by a certified USAF Survival School Instructor. Organized and indexed for easy reference.

North Korea is known as the most repressive country on Earth, with a dictatorial leader, a starving population, and harsh punishment for rebellion.Not the best place for a family vacation.Yet that’s exactly where Mia Andrews finds herself, on a tour with her aid-worker father and fractious older brother, Simon. Mia was adopted from South Korea as a baby, and the trip raises tough questions about where she really belongs. Then her dad is arrested for spying, just as forbidden photographs of North Korean slave-labor camps fall into Mia’s hands. The only way to save Dad: get the pictures out of the country. Thus Mia and Simon set off on a harrowing journey to the border, without food, money, or shelter, in a land where anyone who sees them might turn them in, and getting caught could mean prison -- or worse.An exciting adventure that offers a rare glimpse into a compelling, complicated nation, In the Shadow of the Sun is an unforgettable novel of courage and survival.

***Mars - A Cosmic Stepping Stone" connects ordinary people with the relevance of space exploration in a way not seen since Carl Sagan. **The book encapsulates, completely and understandingly, the 'big picture' about humanity's path to uncovering its cosmic connections and how Mars is critical to that. Few, if any books in the area have attempted to do this and achieve it, since those of Sagan. **The book presents the broadest, most complete, most up-to-date and most exciting account of humanity’s fascination with, and future intentions regarding the Red Planet. **The book is built on the authors 31 years experience of astronomy and 22 years of communicating science to the public, resulting in many unique ideas and unprecedented ways of conveying them. The author is establishing a reputation in his country for this. Such an emphasis is a priority for the book - more so than conveying facts. Few currently available books approach the subject from such a stand point. **A new generation, the second generation since the start of space exploration, deserve literature that encapsulates the important issues of the subject and sets them on their own path of exploration. **The book connects with issues pertanent to todays world. In a global community full of stresses, this book unfolds a positive human story that is of direct relevance to everyone. In a world full of frivolous intrepetations and portrayed fear regarding science, the book brings to the table a grounded yet enigmatic perspective that will bestow a sense of optimism and inclusion.

"But, the beast-man, scorned and hunted, knows without honor there is nothing, not even death. So, driven by the only ghosts that matter, Huma and himself, Kaz alone faces the scourge." After the defeat of the Dark Queen and the death of Huma Dragonbane, the most famous of the Knights of Solamnia, Kaz, the renegade minotaur, wanders throughout Krynn, telling the tale of the land’s most legendary hero, stalked by his enemies - a haunted soul, an outcast, hero. But when Kaz hears rumors of evil incidents, he returns to warn the Knights of Solamnia - and is plunged into a dark nightmare of magic, danger, and deja-vu. Kaz the Minotaur is the sequel to Richard Knaak’s bestselling Dragonlance novel, The Legend of Huma.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand.We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today’s instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.
