The first book on the subject written by a practitioner for practitioners. *Geotechnical Instrumentation for Monitoring Field Performance* goes far beyond a mere summary of the technical literature and manufacturers' brochures: it guides reader through the entire geotechnical instrumentation process, showing them when to monitor safety and performance, and how to do it well. This comprehensive guide:

- * Describes the critical steps of planning monitoring programs using geotechnical instrumentation, including what benefits can be achieved and how construction specifications should be written
- * Describes and evaluates monitoring methods and recommends instruments for monitoring groundwater pressure, deformations, total stress in soil, stress change in rock, temperature, and load and strain in structural members
- * Offers detailed practical guidelines on instrument calibrations, installation and maintenance, and on the collection, processing, and interpretation of instrumentation data
- * Describes the role of geotechnical instrumentation during the construction and operation phases of civil engineering projects, including braced excavations, embankments on soft ground, embankment dams, excavated and natural slopes, underground excavations, driving piles, and drilled shafts
- * Provides guidelines throughout the book on the best practices

Insurance restoration the repair of buildings damaged by water, fire, smoke, storms, and other disasters is an exciting and challenging field of construction. It also offers contractors lucrative work that's immune to economic downturns pipes still break, buildings still burn, and trees are still blown over, regardless of the economy. And with the insurance companies funding the repairs, your payment is virtually guaranteed. But not just anyone can repair fire- and water-damaged buildings. You need the knowledge and the equipment to get the job done right, and that's what this book is all about. From understanding fire repairs and smoke odors to restorative drying methods, mold remediation, and handling contents, you'll not only learn how to provide top-notch property and content restoration services, but also how to become the person homeowners and insurance companies turn to first in an emergency putting yourself first in line for all the best jobs.
